## Sleeving for long-term heat protection

Bentley-Harris® Thermojacket sleeving provides excellent long-term heat protection for hoses, wire harnesses and cables.

Thermojacket is available in a variety of grades, offering industrial users the option of selecting combination of properties best suited to their specific application.

Thermojacket S sleeving is constructed of braided fiberglass with a saturated coating which adds rigidity to the product and reduces the likelihood of end fray. The stiff coating also results in a sleeving that is easy to apply over long length applications and is resistant to mechanical abrasion.

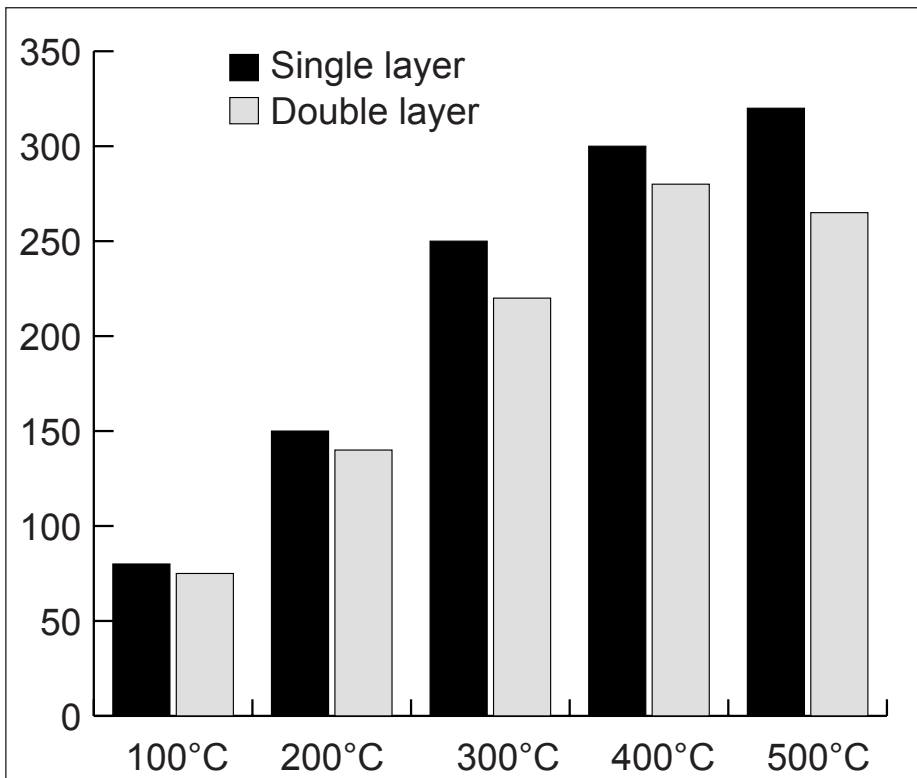

Thermojacket S withstands exposure to long-term heat to 550°C.
